

Abstract

The latest development of the Internet has brought the world into our hands. Everything happens through Internet from passing information to purchasing something. Internet made the world as small circle. This project is also based on Internet. This paper shows the importance of chat application in day today life and its impact in technological world. This project is to develop a chat system based on nodejs, websocket and network concept. The application allows people to transfer messages both in public way .It also enables the feature of sharing resources. This online system is developed to interact or chat with one another on the Internet. It is much more reliable and secure than other traditional systems available. Nodejs and client-server concept were used to develop the web based chat application.
